

# Long Short Term Memory(LSTM)

# Introduction

Long Short-Term Memory (LSTM) networks are a type of recurrent neural network capable of learning order dependence in sequence prediction problems.

This is a behavior required in complex problem domains like machine translation, speech recognition, and more.

Long Short Term Memory Network is an advanced RNN, a sequential network, that allows information to persist. It is capable of handling the vanishing gradient problem faced by RNN.

Today, due to my current job situation and family conditions, I need to take a loan.

Last year, due to my current job situation and family conditions, I had to take a loan.

# Generic Representation of RNN

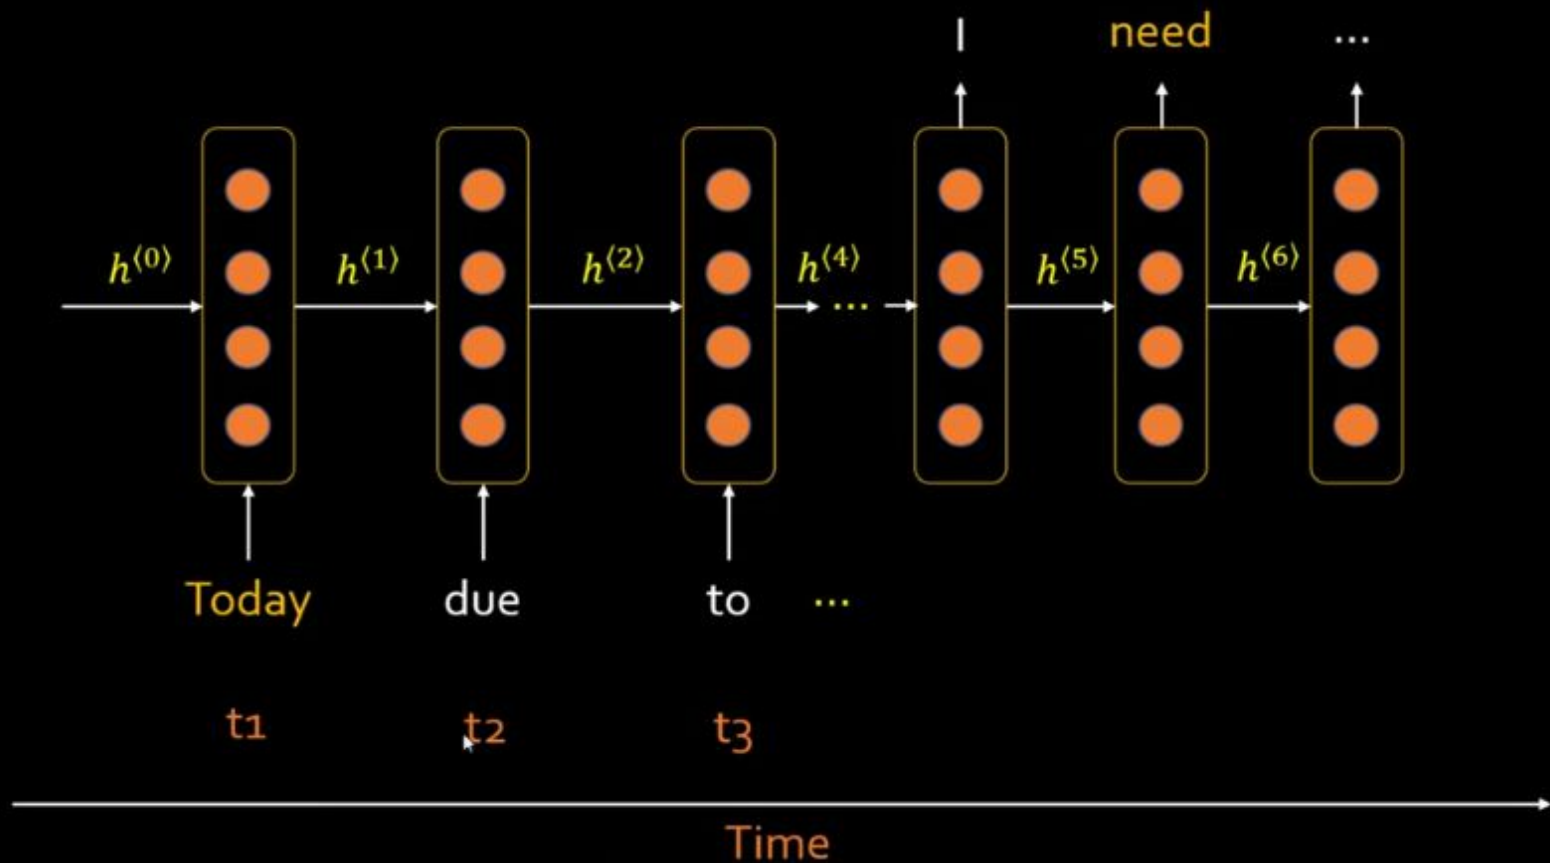

Today, due to my current job situation and family conditions, I need to take a loan.

Today, due to my current job situation and family conditions, I need to take a loan.

Today, due to my current job situation and family conditions, I need to take a loan.
